

Tamar Nidam | Senior Software Engineer .NET & Node.js Expert

Tamar.Nidam1@gmail.com | [GitHub](#) | [LinkedIn](#) | [0508548539](tel:0508548539)

Professional Profile

Senior Full-Stack Developer with extensive experience in leading end-to-end digital solutions. Expert in backend development using **C# .NET**, with strong proficiency in **TypeScript** and **React** for modern frontend applications. Highly skilled in complex integrations between enterprise systems and legacy environments, working with **REST APIs**, and managing **CI/CD** processes. A tech-driven leader who combines product-oriented vision with the ability to rapidly master new technologies and excel in agile, fast-paced organizational environments.

Technical Skills:

Backend: C# .NET (Advanced versions), NestJS, SQL, JavaScript (React, Node.js).

Frontend: TypeScript, JavaScript, React, HTML5, CSS3.

Data & Integration: REST APIs, SQL, Kafka, complex database integrations, and legacy system interfacing.

Methodology & DevOps: Git, CI/CD Pipelines, Docker, GCP, Agile/Scrum.

Core Expertise: System Architecture, End-to-End project ownership, code performance optimization, and modular design.

Professional Experience

Senior Software Engineer | Defense Environment (IDF Civilian Employee) | 2024 – Present

End-to-End Project Ownership: Led projects from initial user requirements and feasibility analysis through architectural design, development, and full production deployment.

Full-Stack Implementation: Developed robust backend services in **.NET** and **Node.js (NestJS)** while creating responsive frontend components using **TypeScript**.

Enterprise Integration: Specialized in data retrieval and integration between complex external systems and legacy databases, utilizing multiple APIs and Kafka for seamless data flow.

Performance & UX Optimization: Upgraded existing systems, optimized complex queries, and enhanced user experience for high-traffic digital platforms.

Technical Leadership: Mentored developers, conducted comprehensive Code Reviews, and led the team to meet challenging development goals under tight schedules.

Agile Collaboration: Implemented and thrived in Agile workflows, collaborating closely with Product and QA teams to ensure high-quality, iterative delivery.

Education & Training

Gama - MAMS Course | Elite Technology Unit, IDF | 2024: Advanced training in Full-Stack development and systems architecture, focusing on building production-ready products and efficient code.

Software Engineering (Mahat): Technological College Diploma.

Lev Academic Center (JCT): Integrated degree-level courses program.

Google Cloud DevOps Bootcamp: Reichman University & Google (Practical experience in GCP, pipeline automation, and CI/CD.).

Values & Strengths

Product Ownership: Dedicated to full feature responsibility, from user dialogue to production troubleshooting.

Adaptability: Proven ability to rapidly adjust to new work environments and evolving frontend technologies.

Team Synergy: Empathetic and positive team player, fostering collaboration across multi-departmental interfaces.
