C# / C++ Software Engineer | Real-Time & Distributed Systems

Software engineer experienced in complex Desktop and Real-Time systems, specializing in debugging, multithreaded applications, and performance optimization. Strong ownership of end-to-end components, fast learner, and independent problem solver. Interested in gaining hands-on Embedded / Firmware experience in a fast-paced, innovative environment.

Professional Experience

Security-Critical Environment | 2024–2026

Developed complex Desktop systems in C# .NET and WPF for operational, Real-Time environments.

Expertise in debugging and troubleshooting multithreaded, performance-critical code, optimizing latency and system reliability.

Designed and implemented multi-layered architecture for multi-server and multi-database systems. Developed APIs for internal and external integrations.

Led code reviews, mentored junior developers, and made key technical decisions.

Collaborated with product, development, and QA teams in high-pressure, deadline-driven settings.

Maintained clean, efficient, and production-ready code following best practices with focus on performance and stability.

Technologies

Primary (Hands-On): C#, .NET, WPF, C++, SQL, MongoDB, Docker, Git, CI/CD, Jira

Additional Experience: Python (automation & scripts), Java, Linux/Bash, Networking

Military Service & Training

Gama Cyber – C4I, IDF | 2024

Advanced Full-Stack Development: JavaScript, React, Node.js, and complex projects.

Education

Software Engineering – MH" T | Integrated technical courses and degree-level training

Google Cloud & Reichman Bootcamp | Hands-on experience with GCP, CI/CD, DevOps

Professional Strengths

Expertise in debugging and optimizing Real-Time, multithreaded systems.

Performance optimization and ensuring stability in critical systems.

Rapid learner with independent research and problem-solving skills.

Full ownership and end-to-end project responsibility.

System architecture design and high-level, multi-service thinking.

Strong communication skills and effective teamwork.
