

Tamar Nidam | Senior Full-Stack Developer

Tamar.Nidam1@gmail.com | [GitHub](#) | [LinkedIn](#) | [0508548539](tel:0508548539)

Professional Profile

Senior Full-Stack Developer with extensive experience in architecting and developing mission-critical distributed systems within defense environments. Expert in **Backend development using C# .NET** (Core & Framework) with significant proficiency in **Node.js** and advanced **Frontend development using React and TypeScript**. Proven track record in leading complex technological deliverables, system architecture, and mentoring developers. **Holds a valid security clearance.**

Technical Skills:

Backend: C# .NET (Advanced), Node.js , Python, REST APIs, Microservices.

Frontend: JavaScript, React, WPF (Complex UI/UX), HTML5, CSS3.

Databases& Data: SQL Server, MongoDB, PostgreSQL, Data Performance Optimization.

Tools & Infrastructure: Pipelines, Automation, Docker (Containers), CI/CD, Git, Jira, GCP.

Core Expertise: System Architecture, Multi-user Debugging, Rapid Self-Learning of emerging technologies, Mentoring, and Technical Leadership.

Professional Experience

Senior Software Engineer | Defense Environment (IDF Civilian Employee) | 2024 – Present

Full-Stack Development: Engineered robust Backend services in .NET and Node.js alongside advanced Frontend components, optimizing for high performance and system resilience.

Complex Technological Deliverables: Led large-scale software modules from characterization and architectural design to full production deployment.

Architecture & Integration: Designed solutions for complex integrations between legacy environments and modern systems, including **GIS-based components** and large-scale data processing.

Technical Leadership & Mentoring: Acted as **Interim Team Lead**, synchronizing workflows across departments, conducting rigorous Code Reviews, and managing the onboarding of new developers.

Operational Execution: Thrived in high-pressure environments, providing precise technical solutions for urgent operational requirements under strict deadlines..

Education & Training

Gama - MMS Course | Elite Technology Unit, IDF | 2024: Advanced training in Full-Stack development and systems architecture, specializing in solving complex algorithmic challenges and performance tuning.

Software Engineering (Mahat): Technological College Diploma.

Lev Academic Center (JCT): Integrated degree-level courses.

Google Cloud DevOps Bootcamp: Reichman University & Google (Practical experience in GCP, pipeline automation, and CI/CD.).

Values & Strengths

Product Ownership: Full end-to-end responsibility for features , from initial requirements to production troubleshooting.

Adaptability: Proven ability to rapidly master new languages, frameworks, and environments.

Interpersonal Communication: Highly effective in Agile team environments and cross-departmental collaboration.
